

# ***Shelf and Radiator Rack***

## ***Assembly Instructions***

***(Suitable for 4 Lath 5 Lath and 6 Lath Airers)***

### ***Contents of your Shelf or Aired:***

4, 5 or 6 Wooden Laths (optional),  
2 Cast Iron Rack Ends, 4 Wall Plugs & Screws

### ***Fitting Instructions:***

Choose a position for the Shelf or Aired.

Mark up where the holes are to be drilled for fixing the brackets to the wall. The brackets should be:

76cm apart for 0.9m Shelf or Aired  
100cm apart for 1.2m Shelf or Aired  
126cm apart for 1.5m Shelf or Aired  
150cm apart for 1.8m Shelf or Aired  
176cm apart for 2.1m Shelf or Aired  
200cm apart for 2.4m Shelf or Aired

***Ensure that the brackets are level, otherwise your shelf or aired will not be level!***

When you have marked up your holes, drill them using a 6mm Drill Bit, ensuring there are no electrical cables or pipes buried in the wall you are drilling. Tap the Wall Plugs into the holes using a light hammer if necessary and screw the brackets to the wall.

Insert the Wooden Laths into the slots leaving:

7cm at both ends for the 0.9m Shelf or Aired  
10cm at both ends for the 1.2m Shelf or Aired  
12cm at both ends for the 1.5m Shelf or Aired  
15cm at both ends for the 1.8m Shelf or Aired  
17cm at both ends for the 2.1m Shelf or Aired  
20cm at both ends for the 2.4m Shelf or Aired

Your Shelf or Aired is now ready for use!

### ***Safety Instructions:***

***Always use caution and safety equipment when using tools. When drilling, ensure there are no electrical cables or pipes behind where you are drilling.***
